## About the Conference

Firstly, it is important to understand that trauma does not cause family violence.; however, it may provide for a greater understanding the correlation between trauma, men and family violence. Men, trauma, and family violence often begins when a male child is expose to the father abusing the mother and is one of the strongest risk factors for transmitting violent behavior from one generation to the next. Research has long identified domestic violence as an issue with the potential for intergenerational patterns violence. The Adverse Childhood Experience study reveals that for every additional ACE imparted greater risk of violence against women and for women who experienced 5+ ACE's the risk was very strong-this is the recipe for men who were traumatized as children and men who commit Intimate Partner Violence.

Trauma may be a difficult topic for men to talk about. Feelings of shame and guilt may surround them. Society expects men to be "tough," but these expectations can cause men to ignore or diminish the trauma in their lives. However, traumatic events cause emotional, physical, cognitive, and behavioral effects. Later in life, these experiences can cause a world of issues including intimate partner violence, addiction, mental health issues, and

This workshop is designed to assist those who provide family violence intervention services to explore the trauma in men's lives and how to develop a trauma informed approach to understanding men, trauma, and family violence.

### Learning Objectives:

1. Review the social information processing model of trauma and intimate partner violence
2. Explore the intergenerational transmission of family violence.
3. Describe how fear works in Intimacy Partner Violence
4. Examine how your biography can determine your biology.
5. Review and discuss Connell's hierarchy of masculinity.
6. Describe how the man's rules makes it difficult for men to talk about trauma.
7. Describe ten things you should know about men and trauma.
8. Developing a trauma informed approach to men who commit intimate partner violence.
9. Develop facilitation strategies for male trauma to interrupt cycles of violence, abuse, neglect, and addiction.
